## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 6, 9 and 11 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kroll et al. (Pat. No. 5,913,877)

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Regarding claims 1 and 11, see Fig. 5.

Regarding claim 6, the examiner considers this claim to represent a product-by-process claim wherein the applicants are attempting to define the apparatus by the method in which it is made. Since the biphasic waveform produced by the Kroll et al. device is of a similar nature to that produced by the present invention, the reason for selecting capacitance values is immaterial if the end result is substantially equivalent. Applicants' claim 6 simply requires the capacitance to be selected for maximum efficiency of the defibrillator –a long-standing goal in the art. Furthermore, the recitation “...maximizing a final myocardial voltage...” is a matter of relative comparison. One can say that the capacitance of the Kroll et al. device is selected to maximize a final

Art Unit: 3762

myocardial voltage as compared to the final myocardial voltage of a prior art defibrillator not employing the improvements disclosed by Kroll et al..

Regarding claim 9, the examiner considers the switching circuitry of Kroll et al. to selectively discharge the capacitors during the at least three steps of the pulse waveform for respective first, second and third time periods. The claim as written does not require any specific discharge arrangement such as set forth in claim 3. A capacitor bank that is discharged while providing the three-peaked waveform is considered to represent the selective discharge of capacitors during three steps.

### ***Allowable Subject Matter***

3. Claims 3-5, 7, 8, 10, 12-16, 18 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 20 and 21 are allowed.

Reasons for allowance of all the above claims have been given in the previous Office Actions.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
